

Quality Policy Statement

1. Statement of Intent

Sheaf Power Limited (WARDPOWER) is committed to achieving the highest possible level of Quality, as perceived by its Customers, Staff and Suppliers, in all its activities. This is achieved by the adoption of a quality management strategy which aims to achieve optimum quality for optimum cost for each and every project that we undertake. Our Quality Management System is ISO9001:2015 accredited. As a specialist engineering company we believe that our commitment to excellence and continual improvement represents our strongest path to the future and that both corporate and individual competence is the key to that objective.

In line with this commitment, we employ only suitably qualified persons. All employees undergo induction and continuous training and, to further compliment this, all personnel are encouraged and facilitated to undertake continuous professional development.

2. Implementation

Our commitment is facilitated by the use of a documented Operations Management System including an Organisational Structure, Responsibilities and Management Arrangements, Operational Procedures and Standards incorporating quality rules and procedures. Collectively, these constitute our Quality Manual and also deal with all our health, safety, environmental, quality and general operational requirements in order to ensure that all such areas are addressed with equal focus and minimum potential conflict.

This system, including this Policy Statement, is subject to periodic review (at least annually) and revision to ensure that it remains relevant and appropriate.

3. Organisation and Responsibilities

The Managing Director is ultimately responsible for all Quality matters within the Company. Managers and Supervisors have specific responsibilities in respect of their own departments and works and these responsibilities are designated in our Operations Management System.

In practice, the responsibility for achieving and adhering to acceptable quality standards rests not only with the Company but also with all its Employees, Sub-contractors and Suppliers. The Company regards it as an obligation of all Employees not only to read this Policy Statement carefully but to take an active interest in achieving the highest possible level of quality.

4. Dissemination

This Policy Statement replaces all previous Quality statements for Sheaf Power Limited. The Directors of the Company shall ensure that all Employees are aware of its contents and the arrangements for its implementation and have access to a copy of the Policy Statement and all associated documentation.

D Steele
